), he revealed a Plate showing: Phoenician inscriptions on Newton Stone of “Part-olon, king of the Scots” about 400 B.C. calling himself “Briton”, “Hittite”, and “Phoenician”.

Dr Waddell then said in the preface, page v:

That long-lost origin and early history of our ancestors, the Britons, Scots, and Anglo-Saxons, in the “Pre-historic” and Pre-Roman periods, back to about 3000 B.C., are now

) recovered to a great extent in the present work, by means of newly discovered historical evidence

An Etymological Lexicon of the English & Other Aryan Languages Ancient & Modern & “Sumer-Aryan Dictionary – Dr L. Austine Waddell then wrote another book entitled:

) said in page 3:

the “Cadmean Phoenician” is the immediate parent of our modern English and European alphabet. The name “Cadmean” was applied to it by the early Greeks after its introducer, King Cadmus The Phoenician of Tyre

But whether Sumero-Phoenician is Aryan (as Dr Waddell thinks), or Semitic or Hamitic (as others think) is a matter of speculations. Indeed, Dr Waddell himself said on the same page of quotation. (Perhaps, the proximity and the strong relationship of Sumero-Phoenician language to the Arabic language might have deterred the biased Eurocentric westerners not to attribute their language to the Arabic Asian Semite origin (relating to Sam or Sham, the son of Noah). However, such Europeans should find some consolation in the First Chapter which, revealed that the Arabic language was in fact, the mother language of Adam on Earth, right from the very beginning, and long before the coming of Noah and his sons, i.e. the Arabic was the mother-tongue the first global village.
